

# The Marathon Health Network

**Marathon Health offers a new approach to employee healthcare and workplace wellness.** Our network of freestanding, interconnected health centers—strategically located throughout metro areas—ensures your workforce and their families have access to healthcare that is near home, work and play. Best of all, we're accessible to employers of all sizes.

## The Marathon Health Difference

### Accessibility

Participation in the Network requires no upfront build-out costs or ongoing operation costs for employers.

### Independent Network

We're independent from any hospital system or health plan provider, allowing us to assist patients in making the best decision for any needed specialty care.

### Continuum of Care

When outside referrals are necessary, our member relations team works closely with patients to help navigate the healthcare system.

### Scalability

When we enter a market, we're committed to market growth and density. As more employers join, we will add locations and providers throughout the city.
